20 *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance: Claims 22-42 are allowable because the prior art of record, in combination with the other claim

limitations, fails to teach, that a service of a connection request is implemented based on the following constraints "(1) the m active input addresses are consecutive upon a rotation of an ordering of the N input addresses, and (2) for any two active input addresses i and j and any two active output addresses p and q such that i is being
5 connected to p and j is being connected to q, if i precedes j with respect to the rotated ordering, then $q < p$..."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on
